

# Updates on MVE Scheme for the Philippine Energy Standards and Labeling (ES&L) Program

Amelia M. de Guzman

OIC-Director, Energy Research and Testing Laboratory Services

Philippine Department of Energy

# **Program Coverage**

The Philippines ES&L Program, launched in 1992, currently covers six types of consumer products:

- 1) Air conditioners (window type and split type)
- 2) Refrigerators
- 3) Self-ballasted compact fluorescent lamps (CFL's)
- 4) Linear fluorescent lamps
- 5) Circular fluorescent lamps
- 6) Fluorescent lamp ballasts (electro magnetic and electronic)

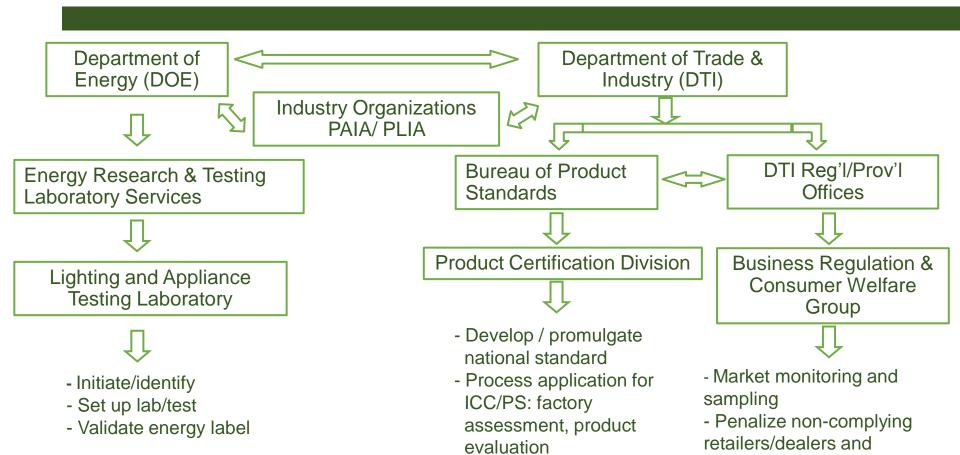

# **Institutional Arrangement**

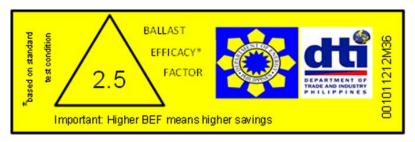

manufacturers

# Sample of Energy Label

Compact fluorescent lamps

Ballast for fluorescent lamps

Brand Name: ABC

Model/ Type: SP15W

Lamp Specifications<sup>1</sup>

Light

900

Output

lumens

Power

15

Consumption

watts

Efficacy

60

lumens per watt

**Average** 

8000

Life

hours

For lamps of similar light output, higher efficacy means more energy savings

<sup>1</sup>when tested at standard test condition

 $^{1}$ rated average life at 50% failure

<sup>3</sup> The minimum efficacy set by the Government for this type of lamp is 57 lumens per watt

CTRL NO. 001021212PD15

# Sample of Energy Label

Brand name: LAMPS

**EFFICACY\*** 

Model/ Type: LFL

Light output, lumens: 2880

Wattage rating, watts: 36

80

001061212T36D

\*based on standard test condition

Important: For lamps with same wattage rating, Higher Efficacy means more saving

THE MINIMUM EFFICACY SET BY THE GOVERNMENT FOR THIS TYPE OF LAMP IS 78 lumens per watt

Linear fluorescent lamps

Brand name: LAMPS

Model/ Type: FCL

Light output, lumens: 2240

Wattage rating, watts: 32

EFFICACY\*

70

\*based on standard test condition

Important: For lamps with same wattage rating, Higher Efficacy means more saving

Circular fluorescent lamps

001091212T32D

# **Present State of Compliance**

#### DOE-DTI Joint Market Monitoring Team findings/concerns:

- Confirmed reports on the sale of products without energy labels in various sales outlets.
- Lack of awareness and understanding of the energy label by the promodizers\* and sales staff.
- Stakeholders' concern on the lack of market sampling.

# Strengthening MVE for the Philippines

#### The SWITCH Philippines Policy Support Project

3-month activity for the strengthening of MVE scheme of the ES&L Program in the Philippines

#### Objective:

To develop guidelines for an MVE scheme for the Philippines ES&L program for the country's market to transition into more energy efficient products

# Strengthening MVE for the Philippines

#### **Activities:**

- Literature research
- Market monitoring
- 3. Stakeholders consultation

#### Literature Research

- Department orders
- Executive Orders
- Memorandum
- Circulars

# Market Monitoring: Developing a manual on MVE system for the Philippines to cover

Monitoring: Monitoring forms

Inspection schedule

Criteria for non-compliance

Issuances

Monitoring report

Verification: Sampling methodology and procedure

Test method

Evaluation criteria

Disposal procedure for test samples

Test report design

■ Enforcement:Issuances regarding penalties

Publication of violators

#### **Stakeholder Consultation**

#### Consultation on completed manual will be carried out with:

- Importers
- Civil society
- Government
- Public

# **Updates on Philippines LED Program**

DOE submitted a Project Proposal to Department of Budget and Management for 2015:

- Title: Institutional Capacity Building for Performance Testing of LED for general lighting
- Budget: PhP 13 M (USD 292,000)
- Major Outputs
  - Test facility
  - Competent laboratory personnel
  - PNS MEPS and energy label
  - Proficiency testing

# Thank You Terima Kasih
